SUMMARY

”Enthusiastic and results-driven B.Tech CSE student at Manipal University Jaipur, specializing in MERN stack development, AI/ML, and cloud-based applications. Experienced in building scalable web applications and leading technical projects, including serving as Technical Head of the International Student Cell (INSELL) and contributing to the International Innovation Challenge hackathon website (mujiic.com). Skilled in React, Node.js, MongoDB, Firebase, and Python with hands-on experience in team collaboration, project management, and problem-solving. Actively seeking SDE/AI internship opportunities for 2025, leveraging strong technical skills and leadership experience to deliver innovative solutions.”

SKILLS

Languages	C, C++, Java, Python, SQL, HTML, CSS, Javascript
Technologies and Tools	ReactJS, NodeJS, ExpressJS, MongoDB
Domains / Interests	Artificial Intelligence, Machine Learning, Deep Learning, Web Development

WORK EXPERIENCE

FullStack Intern

May 2025 - July 2025

AmanStar Information Technology

- Contributed to the development of a fully functional e-commerce platform by building UI components with React.js, creating backend APIs using Node.js/Express, and managing product data with MongoDB.
- Implemented features such as pagination, dynamic search, and tag-based filtering, improving usability and performance.
- Assisted in sales and client engagement, including lead generation, product demos, and bridging communication between business and technical teams.
- Gained hands-on experience in full-stack development, agile collaboration (GitHub, Scrum), and aligning technical solutions with business needs.

Technical Head

Oct 2024 – Present

INSELL, Manipal University Jaipur

- Leading the technical team of the International Student Cell (INSELL), collaborating with the Director of International Collaboration (DOIC) to manage student engagement initiatives.
- Overseeing development and maintenance of club websites, event registration portals, and other technical projects to enhance digital presence.
- Mentoring junior members in web development and technical tools, fostering teamwork and knowledge sharing.
- Coordinating technical support during international events, ensuring smooth execution of online/offline activities.

PROJECTS

International Innovation Challenge Website

Live Site

Developed and deployed a fully functional website for a 36-hour international hackathon, featuring event details, registration portal, and real-time updates. Built using React.js with responsive design, providing seamless access to participants and organizers.

AmanStar E-Commerce Platform

Live Site

Contributed to the development of a full-stack e-commerce platform during internship, featuring product listings, dynamic search, pagination, and tag-based filtering. Built using React.js, Node.js, Express, and MongoDB, designed for seamless user experience with real-time product browsing and filtering.
