Summary

B.Tech CSE student at Manipal University Jaipur, specializing in MERN stack, Artificial Intelligence, Machine Learning, and cloud applications. Skilled in creating scalable web applications and leading technical projects. Currently serving as Technical Head at INSELL and contributed to the International Innovation Challenge hackathon website (mujiic.com). Proficient in React, Node.js, MongoDB, Firebase, and Python. Seeking Software Development Engineer or Artificial Intelligence internship opportunities for 2025.

Skills

Languages: C, C++, Java, Python, SQL, HTML, CSS, JavaScript

Technologies/Tools: ReactJS, NodeJS, ExpressJS, MongoDB, Matplotlib, Numpy, Pandas, Sklearn, TensorFlow

Domains/Interests: Artificial Intelligence, Machine Learning, Deep Learning, Web Development

Work Experience

Full-Stack Intern, AmanStar Information Technology

May 2025 – July 2025

- Engineered 10+ React.js UI components and 5 REST APIs using Node.js/Express, integrating MongoDB for 500+ product records.
- Implemented pagination, dynamic search, and tag-based filtering, improving website performance by 30%.
- Contributed to client engagement and lead generation, supporting 3 successful project launches.

Technical Head, INSELL, Manipal University Jaipur

Oct 2024 – Present

- Directed a 6-member technical team managing websites and event registration portals, increasing online student engagement by 40%.
- Mentored 8 junior members in modern web development practices and technical tools.
- Coordinated technical support for 5+ international events, ensuring seamless execution.

Projects

International Innovation Challenge Website

[Live Site](#)

Built a responsive platform for a 36-hour international hackathon, enabling registration for 300+ participants, real-time updates, and event management using React.js.

AmanStar E-Commerce Platform

[Live Site](#)

Enhanced a full-stack e-commerce system with 200+ products, featuring dynamic search, pagination, and tag-based filtering using React.js, Node.js, Express, and MongoDB.

T20 International Score Predictor

[Live Site](#)

Engineered a machine learning model using XGBoost, pandas, and NumPy to predict T20 international cricket scores. Built an interactive front-end with Streamlit, integrating a trained model via pickle for real-time score predictions.

Education

B.Tech CSE, Manipal University Jaipur

2023 – 2027

GPA: 9.39/10

Class 12th, Some Board

2023

Percentage: 92.8%
